What is Make.com?

- Make.com (formerly Integromat) is a **visual automation platform**.
- It lets you connect apps like Gmail, Sheets, and AI tools — *without coding*.
- You can build workflows that trigger automatically based on events.

Example Scenario

Goal: Automatically create video by sending message to whatsapp

Apps Used:

- Whatsapp business - To check for new message and reply with the youtube link.
- Google Sheets – to log message, prompt, and the video link.
- Google Vertex AI – to generate prompt and video.
- Youtube – To upload the video.
- Make.com – to connect everything seamlessly.

Step 1 – Whatsapp business cloud

Module: **Watch events**

Captures: New message

The screenshot shows a web browser window with the URL eu1.make.com/481137/scenarios/add. The page title is "Integration WhatsApp Business Cloud, Google Vertex AI (Gemini)". The left sidebar has a purple header and contains the following items:

- Org
- Scenarios
- AI Agents
- Connections
- Webhooks
- Templates
- Data stores
- Keys
- More

The main content area features a large green icon with a phone receiver and a lightning bolt, representing WhatsApp Business Cloud. Below the icon, the text "WhatsApp Business Cloud" is displayed with a small notification badge showing the number "1". Underneath, there is a link "Watch Events". At the bottom of the main area, there are two buttons: "Run once" and "Immediately as data arrives".

This screenshot shows a configuration step for sharing business assets. The top bar includes icons for infinity, refresh, and a user profile. The main content is titled "Select the business assets to share with Make for Business Messaging" with the sub-instruction "You can use existing assets or create new ones." A vertical sidebar on the left has a checked green circle next to the first item.

 **Connect your existing WhatsApp Business app**
Share your WhatsApp Business account with Make. You'll still have full access to your WhatsApp Business app and can continue using it.

Sharing access
Account information such as your phone number, contacts, chats and chat history may be shared.

Protecting your data
Individual chats will now be managed using a secure service from Meta. We'll notify your customers about this privacy change.

Make for Business Messaging's [Privacy Policy](#) and [Terms](#)

 

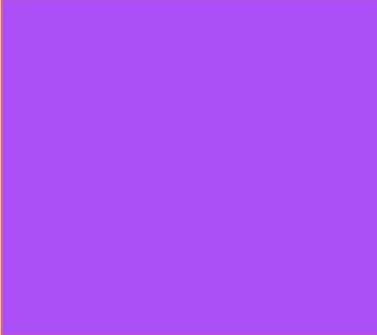

Import contacts and chat history

Your account will be able to share the business profile, contacts, the last 6 months of chat history and other relevant information.

Use the WhatsApp Business app to scan the QR code:

Start the process:

1. Look for a message from the official Facebook business account and tap Connect.

If you can't see that message, tap Menu or Settings, select Account and

Make for Business Messaging's [Privacy Policy](#) and
[Terms](#)

[Back](#)

[Next](#)

The screenshot shows a Make scenario editor interface. On the left, a sidebar lists various components: Home, Org, Scenarios (selected), AI Agents (Beta), Connections, Webhooks, Templates, Data stores, Keys, and More. The main area displays a scenario titled "whatatsapp_message_to_veo_video". The scenario flow starts with a "WhatsApp Business Cloud" step (Watch Events), followed by two "Google Vertex AI (Gemini)" steps (Create a Chat Prompt (Gemini)), and finally a "Google Sheets" step (Add a Row). A "Router" step is also present in the flow. At the bottom, there are buttons for "Run once", "Advanced settings", "Cancel", and "Save". A purple status bar at the bottom right indicates "56 (56) W".

Privacy Status and Scheduling*

Map

Public

Determines video visibility. If you want to upload a video but schedule its publishing for later, set this to **Private** and you'll get the option to set a date to publish it.

Description

This video is created using Google veo in the make automation workflow.

If the description contains < or >, you must delete those specific characters. All other characters are accepted.

A Must be at most 5000 characters long.

The video is made for kids

Map

Yes No

If the video is made for kids, regardless of your location, you're legally required to comply with the Children's Online Privacy Protection Act (COPPA) and/or other laws.

The video contains altered/synthetic media

Map

Yes No

This should be set to **Yes** if your video contains Altered or Synthetic (A/S) content, such as realistic AI-generated or edited content. See the [YouTube A/S policies](#) for details.

Examples of A/S content include videos that:

- Make a real person appear to say or do something they didn't actually say or do
- Alter footage of a real event or place
- Generate a realistic-looking scene that did not actually occur

Can you create a video for my ornament business. Showcasing my special ring. My jewellery brand name is vrindavan.

12:09 am ✓

Your video is generated and is available at <https://youtu.be/GBwuhhZdw7M> 12:11 am

Limitations of MAKE

- Execution Frequency

On the Free plan, scenarios can run **every 15 minutes** (not real-time). Paid plans can go as low as **1 minute** intervals.

- Operation Limits

Each step in a scenario = 1 operation. Free plan gives **1,000 ops/month**; higher plans go up to millions.

- Data Retention

Execution logs and data bundles are kept for **7 days (Free)** or up to **90 days (Pro/Enterprise)**.

- Execution Time

Each scenario run can last **max 40 minutes** (Free/Basic) — longer ones are automatically stopped

- Parallel Executions

Limited number of concurrent scenario runs depending on your plan tier.(how many scenario instances can run at the same time.)

Thank you
